Allowable Subject Matter

1.   The following is an examiner's statement of reasons for allowance: in combination with other limitations of the claims, the cited prior arts fail to teach a logic circuit having two input terminals for receiving the output signal from the inverter and the output signal from the delay circuit and having an output terminal, as recited in claim 6; the cited prior arts also fail to teach a control circuit receiving an input signal supplied to the input terminal of the buffer circuit and outputting a signal to be supplied to a gate of the second MOS transistor, as recited in claim 9; the cited prior arts also fail to teach the control circuit outputting the signal at a logic level for turning off the second transistor when the selection control signal input thereto indicates a value commanding deactivation of the buffer circuit, as recited in claim 14; the cited prior arts also fail to teach a selection control signal for controlling activation and deactivation of the buffer circuit or an inverted signal of the selection control signal, and, as recited in claim 15; the cited prior arts also fail to teach a logic circuit having first, second and third input terminals for receiving a signal at a logic level inverted from the logic level of the output signal of the output terminal of the buffer circuit and stored and held in the flip-flop circuit, as recited in claim 16; and the cited prior arts also fail to teach a delay circuit for receiving the input signal supplied to the input terminal of the buffer circuit and outputting a delayed signal of the input signal, as recited in claim 17.

2.   Claims 6-9, 11-22 and 25 are now in condition for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on

Statement of Reasons for Allowance."
